

Observer sheet

General information

City, country:

Date, time:

Observer(s):

Main objectives of the role:

1. General observations

To find out about

- a. The understanding of industries on RRI?

- b. Industries previous RRI experiences?

- c. The challenges and needs of industries with relation to employing RRI? Please report here the identified challenges and needs for the group you have observed. Were there any overarching issues or was there any common view on the main challenges and the needs?

Group:

Room:

2. The tools discussed and created to support industries in employing RRI

During the brainstorming, discussion and prototyping phase, please specify what were commonalities, recurrent issues, expressed needs, concerns, insecurities, overall themes, special challenges and barriers etc.

3. Please collect information on all ideas selected for further development. Please make a short “case study” the idea of the prototyping group you attended. Address the following topics:

- Explain the main idea
- Explain the need the idea responds
- Include a picture of a prototype (optional)
- Explain the main feedback to the idea
- Explain the discussion about the idea

Furthermore, by having a look at the other prototypes and the discussions in the plenary:

Conduct a short meta-level analysis of the ideas, addressing the following questions:

- Were there any common challenges or needs that the ideas aimed to address
- Did the ideas take any common approaches to addressing the problems? Were there common features on the prototypes to be recognised?
- Did the group as a whole value the different prototypes? Were some prototypes assessed to be more fit-for-purpose than others?

THANK YOU!
